

The Boeing war machine

Boeing is second in the world for defense sales. Boeing's weapons are used by armed forces all around the world in a multitude of conflicts including being the #1 war profiteer in the Yemeni genocide. Boeing weapons are also used against Kurdish US allies in northern Syria in an area known as the Democratic Federation of Northern Syria (DFNS). According to former President of Boeing-Turkey, Greg Pepin, Boeing is "not only a provider of commercial airplanes to the airlines of Turkey (but also) a supplier to the Turkish Armed Forces." Fighters from the DFNS were instrumental in eradicating ISIS/ISIL from the region and are soon to be the target of an invasion by Turkish fighters using Boeing weapons.

Boeing weapons

What can you do?

- Look into what the DFNS is and why is it being attacked
- Start a petition to stop the sale of arms from Boeing to countries for their unjust wars
- Spread the word and discuss with friends and co-workers
- Send us information on weapons built by Boeing and sold to genocidal regimes:
