

Update On The Wet'suwet'en Struggle

Currently the Wet'suwet'en Nation, most notably the Unist'ot'en house, Gidimit'en clan and Likht'samisyu clan are continuing to resist the colonial and capitalist processes which attempt to displace Indigenous peoples from their land and destroy land and water. By reoccupying their traditional and unceded territories the Wet'suwet'en nation has resisted pipeline development across so called BC.

The Wet'suwet'en resistance has met considerable state and vigilante violence. In January the RCMP invaded and destroyed Gidimit'en Camp and then proceeded to use the threat of violence to access Unist'ot'en territory. Under the protection of the state, pipeline companies have entered the territory built man camps and began clearing the right of way. FORCE IS NOT CONSENT.

As winter approaches the Wet'suwet'en front lines are preparing to continue this fight. A massive amount of work is necessary to prepare all camps for the cold, hard battle ahead. Please consider donating at any of the three links below, this is a concrete way to support front line Indigenous communities fighting the capitalist and colonial processes which are destroying Wet'suwet'en land and planet more broadly. Folks with carpentry, cooking, camping, frontlines or direct action experience are encouraged to contact the camps directly if they wish to get involved.
